

Praxis Bonn-Zentrum — Outpatient Clinical Note

Diagnosis & Treatment Plan

Patient: Test Patient | DOB: 1990-01-01 | Visit Date: 2026-06-28

Assessment

1. Iron-deficiency anemia, resolving (ICD-10 D50.9)
2. Type 2 diabetes mellitus, well-controlled, HbA1c 6.8% (ICD-10 E11.9)
3. Dyslipidemia, on statin therapy (ICD-10 E78.5)
4. Asthma, intermittent, well-controlled (ICD-10 J45.909)

Plan

Continue ferrous sulfate and Vitamin C for 8 more weeks; recheck CBC and ferritin at next visit. Continue Metformin and Atorvastatin. Albuterol inhaler PRN for asthma symptoms — reviewed proper inhaler technique. Patient counseled on Warfarin–Aspirin interaction risk given family history of cardiac disease; will avoid concurrent NSAID use.
